

## P31 BROQUET FUEL CHARGER

# **BROQUET**

**THE ORIGINAL FUEL CHARGER FROM UK**

The Broquet fuel catalyst has been used in thousands of motorcycles, from vintage BSA's to modern Suzukis. Owners have improved performance and reduced fuel consumption by fitting the Broquet fuel catalyst.

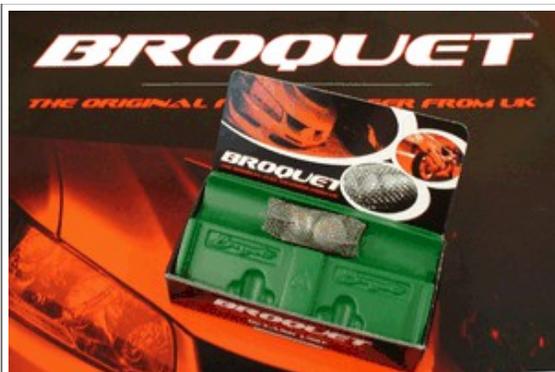

### **Benefits of fitting Broquet to motorcycles are:**

- Improved performance
- Reduced fuel consumption
- Reduced exhaust emissions (HC & CO)
- Reduced engine maintenance
- Use of unleaded petrol (in older engines)
- Increases power
- Lasts 400,000KM
- Maintenance Free
- Easier starting and smoother running
- Suitable for use with catalytic converters
- Keep engine oil cleaner
- Eliminates engine 'coking'
- Quickly pays for itself
- \$6,000,000 world wide warranty
- LTA compliant

### **IN-TANK UNITS**

The most effective, fuel catalyst systems available in the market. In-Tank Systems are simple to install, requiring only "dropping down the chute" or through the float sensor cover. The Systems are designed for the value-for-money oriented customer and it gives all known Broquet benefits including keeping the fuel "fresh". It is a Once off Fit-&-Forget system that will last a whopping 400,000 km or probably 15-20 years in Singapore. Broquet's formula is the original and till today mostly imitated but never duplicated.

Broquet's effect on fuel happens at the molecular level where it optimises the percentage of 'clean-burn' hydrocarbons in the fuel. (Typically this can be about 70-80%) The result is an increase in combustion efficiency which leads to greater fuel economy and power output. Besides this, Broquet's effect on fuel promotes smoother burning, cooler combustion temperatures and regulated burning cycles especially at high rpms where burning is usually quite erratic. The result is a quieter and smoother engine at any rpm! Ask any Broquet user and they'll tell you how different their engines perform and the incredible fuel savings they love!
